## EMERGENCY LIGHTING EQUIPMENT

The K-SIGN is a case containing rechargeable and synchronizable LED beacons. This system is a quick and easy deployment signaling system. Within a minute, you can secure a zone and make people aware of a temporary safety risk. Made from robust, waterproof and impact resistant plastic materials, the case contains 6 or 10 rechargeable beacons.

Each LED beacon lights up automatically as soon as it is removed from the case and communicates with the others. Once removed from the magnetic charge position, the beacon automatically activates and sync with the other beacons. Once removed from the magnetic charge box, the beacon automatically activates and sync with the other beacons.

Thanks to a simple two-button control, you can choose between 6 flashing modes in 3 different colors: amber, red and blue.

## Technical Data

Sequential function	Synchronizable beacons communicate with each others	
Lighting modes & runtime	Pulsed flash (waveform)	12 hrs
	Single flash	60 hrs
	Slow flash	30 hrs
	Fast flash	48 hrs
	Double slow flash	50 hrs
	Double fast flash	30 hrs
Battery	3000mAh 3.7V lithium battery - Rechargeable inside the case	
Charging time	6-7 hrs	
Visibility	360° illumination - Up to 5,000ft at night	
Resistance	Waterproof (IP67) up to 32ft immersion   Crushproof up to 3 tons pressure   Drop-resistant up to 16ft	
Operating temperatures	-40°F to 140°F	
Case dimensions	10.8' x 14' x 3'	
Total weight of loaded case	11.5 lbs	
LED beacon dimensions	4.6' x 4.6' x 1.5	
LED beacon weight	0.6 lb	
Features	Integrated powerful magnets	
Material warranty	3 years
