### Atlas Copco Power Technique compressor

800-732-6762; [atlascpco.us](http://atlascpco.us)

The single-stage, oil-injected, rotary screw XATS 250 portable compressor from Atlas Copco Power Technique, Rock Hill, S.C., features cognitive electronics (PACE) technology, which allows the operator to control the machine's pressure. The compressor can be set as low as 58 psi to 100, 112, 124, 138 and 150 psi and has a hardhat canopy.

### Compressed Air Systems portable compressor

800-531-9836; [compressed-air-systems.com](http://compressed-air-systems.com)

The 110V portable rotary screw compressor from Compressed Air Systems, Mansfield, Texas, can operate 24/7 if needed, the company says. The compressor comes with simplified operating controls, a single-control solenoid operation and UL control components. The product is equipped with an easy-to-remove bolt-on oil cooler for cleaning along with an extended oil drain with ball valve for service. The compressor features a 10-gal., 200-psi rated air receiver.

### Airstar America compact light tower

800-217-9001; [airstar-light.us](http://airstar-light.us)

The 176-lb. compact Sirocco 120,000 lumen LED balloon light tower from Airstar America, Orlando, uses 1,000W of power and can be operated from a suitcase generator. Illuminating up to 32,047 sq. ft., it produces 360 degrees of glare-free, shadow-free diffused light at 6,000K (daylight). The all-steel tower measures 59.5 in. long and 26 in. wide. The vented generator compartment can be locked and outriggers extend 2 ft. beyond the frame, keeping the unit stable. A 12-gal. external fuel tank is available to increase runtime.

### PHP portable power distributor

800-362-6951; [phpdistribution.com](http://phpdistribution.com)

The X-Treme Box seven-outlet straight-blade portable power distributor from Southwire, Carrollton, Ga., distributed by PHP, Valparaiso, Ind., is equipped with flagged circuit breakers for easier troubleshooting. The machine has premium breakers and an all-copper backplane along with spring-loaded flip covers on all inlets and outlets. Several boxes can be run in series before a significant drop in voltage occurs. The distributor has weather-proof receptacles and circuit breaker cover along with a corrosion-resistant powder-coat finish.
